EPISODE ACTION PLAN -- APPROVED
I.D. Number 031600AHO

April 25, 1988

The Sherwin Williams Co.
Attention: Robert C. Martin
11541 South Champlain Avenue
Chicago, Illinois

EPA Region 5 Records Ctr.

355890

Dear Mr. Martin:

The Air Pollution Episode Action Plan submitted for your facility has been reviewed by the Agency and is hereby approved. 35 Ill. Adm. Code Part 244, "Episodes", requires immediate implementation of the steps described in your Action Plan should an air pollution Alert or Emergency occur. Therefore, a copy of the Action Plan should be kept available on the premises to which the Plan applies.

During a Watch, Alert or Emergency the Agency will contact by telephone the person(s) designated on the Plan for each facility required by the Regulations to receive notification. Such facilities are those "facilities required to make preparations or take actions of major emissions reducing consequence". Additional facilities will be contacted as time allows. In addition, public announcements will be issued to the press and broadcast over radio and television stations. The appropriate measures of your Plan must be taken regardless of how you become aware of the situation.

Please note that Section 244.143(d) requires that ... "Facilities having operational changes invalidating plans shall within 30 days of such changes submit a new plan for Agency approval." The Agency strongly recommends that your facility frequently review your Action Plan for its operational accuracy and for accuracy as to correct names and numbers of contact persons.

Such frequent review may prevent violation of the Illinois Environmental Protection Act and any resultant penalties.

Should you have any questions or find it necessary to revise your Action Plan, please contact Don Hanko.

Very truly yours,

Terry A. Sweitzer, P.E.
Manager, Permit Section
Division of Air Pollution Control
